

Prexcyt Quest: The First Cryptex Hunt Solution Guide

Song of the Demon

The music clip contains a series of garbled sounding audio. The presence of the demon is a clue toward [Backmasking](#), a technique of hiding messages that can be heard by playing the track backward; this technique drew a lot of controversy and accusations that it was being used to hide subliminal, Satanic messages.

Reversing the audio makes the songs more intelligible and the listener will find a series of musical pieces joined together, separated by a series of 3 tones. The musical pieces all relate to locations in Midgaard. The three tones heard before each piece are the notes B,E,G.

Song Title	Artist	Midgaard location
Kate	Ben Folds Five	Kate's Diner
Promenade	U2	Promenade
Palisades Park	Freddy Cannon	Park Road
Emerald Sword	Rhapsody	Emerald Ave
Jurassic Park	John Williams	Emerald & Park Road
A Nightmare on Elm Street (Prologue)	Charles Bernstein	Elm St
Cemetery Gates	Pantera	Graveyard

The approach is to follow the route indicated around the map starting at Kate's Diner, and to BEG at various location. When done at the proper locations, it will reveal one of a series of images.
